EDUCATION

Veermata Jijabai Technological Institute

B.Tech in Electrical Engineering — CGPA : 8.1

Mumbai, India

June 2023 - June 2027

EXPERIENCE

Heavy Electricals Intern | [🔗](#)

Dec 2025 - Jan 2026

- Analyzed supply chain data in **control panel manufacturing**, identified inefficiencies, and optimized procurement and inventory flow to improve production efficiency.
- Prepared data-driven reports supporting decisions in **marketing, scaling**, and **HR**, improving coordination and overall business operations.

Cyber-Security Analyst | [🔗](#)

23rd Aug 2024 - 23rd Oct 2024

- Completed a hands-on CyberSecurity internship with strong dedication, gaining practical exposure to **web security** and building a solid foundation in identifying vulnerabilities and system protection.
- Applied OWASP Top 10 concepts with strong enthusiasm through **TryHackMe** and **bug-bounty labs**, gaining hands-on experience in identifying vulnerabilities-testing web application security.

COMPETITIONS

Inheritance 2024 [🔗](#) | DID, Truffle, Remix IDE Framework

Jan 2024 – Mar 2024

- Developed a decentralized blockchain-based system for managing patient and insurance data using **Ethereum** and **IPFS**, ensuring secure, reliable, and easily accessible medical records.
- Built and tested smart contracts using **Remix IDE** to automate validation, improving data security, reducing manual effort and unauthorized manipulation.
- Delivered an end-to-end solution meeting all problem requirements; ranked 2nd.

PROJECTS

Caresync: Secure health Records [🔗](#) | Solidity, Web Development, Metamask

Jan 2024 – Mar 2024

- Developed a blockchain-based platform to securely manage patient and insurance data, ensuring privacy, data integrity, and tamper-proof access using **smart contracts**.
- Built backend logic and APIs using **Node.js** and **Express.js** for smooth data flow and system functionality.
- Enhanced data integrity, access/control, confidentiality through cryptographic hashes security and dynamic UI/UX components.

Windows Malware Development [🔗](#) | Windows Defender, Microsoft Visual Studio 2022

June 2025 – Present

- Developed low-level programs using C/C++, Win-API, focusing on system behavior and understanding security mechanisms.
- Applied various tools to **reverse-engineer**, debug, and verify stealth payload behavior.
- Performed Mini project parts like DataPayload Placement, TextPayload Placemnt, RC4 Encryption/Decryption for Windows Powershell & pursuing it further to become a part of Blue team CyberSecurity.

COURSES AND CERTIFICATES

Coursera : BlockChain Architecture by LearnQuest

Coursera : Introduction to Cyber Attacks By NewYork University.

TECHNICAL SKILLS

Languages : C/C++, Python, solidity , Bash Scripting, HTML, CSS, JS.
Frameworks : Truffle, Remix - IDE, Metamask, Next.js, Docker, Nmap.
Technologies : Kali Linux, Git, Matlab, PESTudio, ProcessHacker
Libraries : Clang, NumPy, Reactjs, Nodejs.
Developer Tools : VS Code, MS Visual studio, IPFS, SQLMap, FUFF, Simulink, x64dbg.

COMMUNITY, CLUBS & EXTRA-CURRICULAR

Community Of Coders, VJTI [🔗](#)

Nov 2023 - June 2024

- Mentee in 2023 and Maintainer in 2024
- Held workshops on a variety of subjects, such as **Git/GitHub**
- Developed all the coding skills mentioned under skilled professionals

Rangwardhan [🔗](#)

Sept 2024 - May 2025

- Efficiently managed on-ground logistics and crowd coordination for an annual social fest with 2,000+ attendees across multiple venues.
- Served as primary POC for the Chief Guest, **Hon. Education MInister, Mr. Deepak Kesarkar** , managing all the protocols.
