PROFESSIONAL SUMMARY

Machine Learning and Cybersecurity enthusiast with hands-on experience in penetration testing, vulnerability assessment, and SOC-based threat analysis. Skilled in network security, OSINT, and secure system design, with exposure to Blockchain and Li-Fi technologies. Strong focus on identifying attack vectors, automating security workflows, and building resilient systems.

EDUCATION

Veermata Jijabai Technological Institute (VJTI), Mumbai

Jun 2023 – Jun 2027

Bachelor of Technology in Electrical Engineering

Minor: Electric Vehicles, Cybersecurity

CGPA: 8.36/10

EXPERIENCE

Cybersecurity Analyst (Work Proof)

Aug 2025 – Oct 2025

- Conducted vulnerability analysis aligned with the OWASP Top 10, identifying attack surfaces and improving detection strategies within SOC workflows.
- Performed penetration testing and security assessments of web applications, enabling early threat detection and risk mitigation.
- Monitored logs and security events to detect anomalies and strengthen the defensive posture.

PROJECTS

Smart India Hackathon Platform — Blockchain, Machine Learning, Full Stack

Dec 2024

- A secure digital transaction platform with a scalable backend architecture using Ethereum and blockchain, with an integrated frontend, backend, and distributed systems for secure data flow.
- Optimized to achieve 110 TPS (transactions per second) with a latency of 12 seconds.

Li-Fi Research (Documentation) — Visible Light Communication, IoT

Mar 2024

- Designed an LED-based communication system using photodiode receivers, achieving 2+ Gbps throughput (peak 45 Gbps).
- Benchmarked Li-Fi and Wi-Fi based on security, latency, and IoT applications.

Cybersecurity Toolkit (Malware Simulation) — C, C++, OSINT, Networking

Dec 2024

- Built 20+ offensive toolkits under malware development, including AES, phishing, enumeration, and other offensive sub-domains.
- Implemented offensive security features for network analysis, traffic monitoring, and bypassing techniques.

Healthcare Blockchain Platform — Ethereum, Solidity, IPFS, FastAPI

Jan 2024

- Built a decentralized healthcare system using smart contracts with secure access control.
- Achieved 2nd place among 90+ teams in Inheritance 2024.

TECHNICAL SKILLS

Programming: Python, C, C++, JavaScript, Bash, Solidity

Machine Learning: Scikit-learn, TensorFlow, Pandas, NumPy, Model Training, Data Analysis

Cybersecurity: Penetration Testing, Vulnerability Assessment, OSINT, Network Security, OWASP Top 10, SOC Monitoring

Tools: Git, GitHub, VS Code, Docker, MATLAB, Simulink, Postman, Nmap, Wireshark

Cloud & Platforms: Google Colab, Azure ML, REST APIs

Databases: MySQL, MongoDB

CERTIFICATIONS

Blockchain Architecture Design and Use Cases – LearnQuest

Blockchain and Cryptocurrency – University of Michigan

Introduction to Cyber Attacks – New York University

LEADERSHIP AND ACTIVITIES

Community of Coders, VJTI

2023 – 2024

- Promoted from Mentee to Maintainer; mentored students and conducted workshops on Git and MATLAB.

Rangwardhan Fest Coordinator

2024 – 2025

- Managed operations for more than 2,000 attendees and coordinated with government officials.
